

PM series balances offer good ergonomics, wide range of applications and comfort of operation.

Usage Ergonomics

With use of long cable it is possible to locate the terminal in a place facilitating convenient operation.

The terminal design allows to mount it on a wall at suitable level.

PM series is equipped with only 11-centimetre high weighing platform, the lowest permissible solution for instruments of this class. The unique measuring system solution is characterized with great resistance to ambient conditions change.

Wireless communication between the balance and the terminal ensures safe operation of the instrument in a fume cupboard or glove box chamber in the course of weighing of toxic substances (chemicals, poisonous vapour etc.).

Settings Customization and Accordance with CFR21

Modern weighing terminals used along with PM series balances enable adjusting balance settings to individual requirements of particular operators. Additionally they guarantee data safety and limited access which prevents unauthorized users against entering the balance program.

Large display with clear menu layout offers even more comfortable operation making your work enjoyable like never before.

PM series balances comply with CFR21 standard. This is pioneer solution available on the market that adheres to CFR21 requirements implemented in the balance firmware (4Y series).

Cooperation with External Devices

PM series is equipped with complete range of communication interfaces enabling connection of numerous peripheral devices.

PC Computer

Printer

Keyboard

Additional display

Barcode scanner

Thermo hygro barometer

RFID reader

PLC

Tower lights
